SUMMARY

Associate Software Engineer with experience building responsive web applications, AI tooling, and automation solutions. Skilled in React, TypeScript, JavaScript, Python, Java, and REST APIs. Passionate about frontend engineering, problem solving, and creating intuitive user experiences

EXPERIENCE

BELTECH AI — Bengaluru, India

Associate Software Engineer | Feb 2026 – Present *

Engineered responsive frontend architectures for the "Clio box" and "Clio Customer Hub" platforms, completely transforming static desktop interfaces into fluid mobile views and optimizing complex data layouts like the system's Challan generation pages.

- **Architected a comprehensive data annotation engine** within a unified custom GUI environment ("BELTECH Prism") to handle focus, blur, and Region of Interest (ROI) adjustments, directly streamlining camera calibration for the AI pipeline.
- **Developed robust Python automation scripts** utilizing Selenium to extract real-time telemetry and monitor system health from internal dashboards, including a daily archival system that dynamically synced complex data logs to Google Sheets.
- **Built a local real-time RTSP video recording tool** using JavaScript to seamlessly capture and stream live camera feeds directly into the primary data processing framework. - [Link!](#)

EDUCATION

- **Master of Computer Applications (MCA) — Online** | Manipal University Jaipur (MUJ) | 2026 - Present
- **Bachelor of Computer Applications (BCA)** | Maharishi Dayanand University, Rohtak | Graduated: 2025
- **Secondary Education:** CBSE Class XII (2022) & CBSE Class X (2020).

PROJECTS

Web & Data Platforms

- **AB Happy Paws (Live Pet Shop App):** Built and deployed a responsive multi-page web application using HTML, CSS, and JavaScript. Integrated product galleries, category pages, and Google Photos for dynamic media delivery.
[Live at: <https://abhappypaws.com>] - [Live Site](#)]
- **Paws & Hearts:** Site developed and deployed on Github and Vercel in order to fundraise for the ones in need.
[Live at : <https://pawsnhearts.vercel.app> | [Live Site](#)]
- **Weather-Wise:** Built a frontend application to visualize 20 years of historical weather data models for the NASA Space Apps Challenge (Oct 2025). - [Github](#)
- **SafeGuard India:** Designed a web directory consolidating national emergency helpline infrastructures into a single public dashboard (Nov 2025). [Live Site](#) | [Github](#)
- **The Pottery Passion:** Developed a custom design Pottery/Crockery online store with custom layout and design as per the client request, used Shopify Liquid to make the layouts —[Live at: [ThePotteryPassion.com](#) | [Shopify Store Link](#)]

IoT Automated Farm Monitoring System (1st Place Hackathon Winner) | Feb 2024 * [\[Github\]](#)

Designed and developed an Arduino-based system for monitoring soil moisture and automatic plant watering.

- Achieved a 20% reduction in water usage for plants.
- Awarded first place for an innovative IoT solution in farm agriculture at SGT University.

Smart Security Door Unlock | 2024

- Developed a door lock system using ESP32, Blynk app, and RFID.
- Enabled remote unlocking from a smartphone and manual access through RFID or a physical switch for enhanced flexibility and security.

Remote-Controlled Flying Plane Model | 2024

- o Engineered a functional model plane applying principles of aerodynamics and mechanical design.

TECHNICAL SKILLS:

Programming Languages:

Java, JavaScript, TypeScript, Python, C++, SQL

Frontend:

React, Tailwind CSS, HTML, CSS, Bootstrap

Databases:

MySQL

Backend:

Apache Tomcat, JDBC, JSP/Servlets (basic),
Hibernate

Tools & Platforms:

VS Code, Intelli J, Git & GitHub, Arduino IDE,
Termux

Concepts:

OOP, Data Structures & Algorithms, ER&EH,
SDLC, REST API

IOT & Hardware:

ESP32, Sensors, BLYNK App,
Sims

Operating Systems:

Windows, Linux (basic CLI)

CERTIFICATIONS: [\[Link\]](#)

- **IoT Soil Moisture Sensor Project – Hackathon Winner** ~ *SGT University (Feb 2024)*
Developed a smart irrigation system using Arduino and sensors, awarded for innovation and efficiency.
- **J.P. Morgan Software Engineering Virtual Experience** ~ *Forage (July 2024)*
Gained practical exposure to agile development, Git workflow, and bug fixing through a virtual internship simulation.
- **Certificate in Excel Proficiency & Analytics (CEPA) –** ~ *Anudip Foundation & DPGITM (Dec 2024)*
Achieved A Grade in the certification and mastered Excel tools for data cleaning, visualization, and basic analytics.
- **Summer Analytics 2025 – Consulting & Analytics Club** ~ *IIT Guwahati (July 2025)*
Completed a 6-week case-based program focused on analytics, problem-solving, and data interpretation using real-world datasets.
- **NASA Space App Challenge** ~ *NASA (OCT 2025)*
Build a web app using java, python and react on “Will it rain on my Parade?”
- **Fundamentals of Java Core & Web Programming –** ~ *Anudip Foundation (Dec 2025)*
- **Front-End Development- [Certificate Link](#)** ~ Coursera
- **Programming with Javascript – [Certificate Link](#)** ~ Coursera

LEADERSHIP & VOLUNTEERING:

- **Photography and Logistics Coordinator:** Led photography and logistics for college festivals, coordinating a team of 10 members to cover events attended by over 300 students, ensuring smooth operations and high-quality event coverage.
- **Photography Club Leader:** Organized workshops and exhibitions as Photography Club Leader, increasing member engagement by 20%.
- **Literary Club Volunteer Leader:** Led literary events and debates as Literary Club Volunteer Leader, enhancing campus literary culture.
- **Tech Event Organizer:** Organized a BGMI gaming tournament with a team of 5, engaging over 200 participants and enhancing event coordination skills.

LANGUAGES:

Fluent in English, Hindi, and Punjabi, and basic French.
